Homework #4.

Assigned : 6/24/2024

For each of the following programing questions, you should write a PHP & HTML 5 document. The name of each document should be the format HW4_Q#.html where # should be replaced with the question number (for example, for the question Q1, the name of the HTML5 document is HW4_Q1.html)

Each PHP & HTML5 document should be in an individual file.

I also need a word document that contains:

1) A snapshot of your execution output for each question
2) Please include a photo of your face in the cover page so that I can match the name to your face.

(If you do not submit this document, your homework will be deducted by 20 points)

Finally, please create a YouTube video. You should explain how your codes work for each question in that video. After uploading the video on YouTube, you should include the YouTube link in the Word document. **(If you do not include the link, you will lose 40 points)**

Zip all HTML5 files and the word document (this one should include the YouTube video link),, and submit the zip file.

Please upload your submission under the folder "Homework 4" in the blackboard. The

due date for this homework is by 11:59pm on July 10 (Tuesday).

Important reminder: You must write your own codes and give your own answers. If you copy someone else's codes or answers, it is a serious plagiarism. You will receive zero for this assignment and disciplinary actions will be taken.

Late Policy: If you submit *m* days later, your maximum grade will 100*(1-0.*m*). For example, if *m*=2, your maximum grade is 100*(1-0.2)=100*0.8=80.

Every Web programming question comes from our textbook: [Paul Deitel, Harvey Deitel, and Abbey Deitel , **Internet and World Wide Web How To Program (5th Edition)**, Pearson, ISBN 13: 978-0132151009]

Q1. Exercise 11.8 (p. 390) (6 pts)
Q2. Exercise 11.9 (p. 390) (6 pts)
Q3. Exercise 11.11 (p. 390) (6 pts)
Q4. Exercise 11.14 (p. 391) (6 pts)
Q5. Exercise 11.22 (p. 391) (6 pts)
Q6. Exercise 19.7 (p. 707) (10 pts)

Q7. Exercise 19.8 (p. 707) (30 pts)
Q8. Exercise 19.9 (p. 707) (30 pts)
